The Lab exam tests any feature that can be configured on the equipment and the IOS Software releases indicated below. You may see equivalent platforms and more recent IOS versions installed in the lab, but you will not be tested on the new features of a release unless indicated below.

### Version 5.0

Cisco ISR 2900 Series routers running IOS version 15.3T Universal Software release  
Catalyst 3560X Series switches running IOS version 15.0SE Universal (IP Services) Software release

The CCIE Routing and Switching Lab exam environment is fully virtualized and no actual hardware platform is being used.

The above platforms are recommended to learn the functionalities supported in Cisco IOS 15 Software release. Older equipment platforms and IOS Software releases may be used to learn a significant portion of the exam topics.
